NSSC Support Requirements

The NSSC has had amazing support from the NASA Centers and we would like to especially thank the Change Integration Team and the Center Transition Teams. The NSSC will continue to need support from these highly collaborative and successful teams; however, we will also need temporary assistance from center experts in the functional areas (Financial Management, Human Resources, and Procurement) of specific work activities which are transferring during the first two quarters of FY06. The NSSC has identified the intermittent need for 14 people from across the agency to help us with activity transition and business office support between September 2005 and May 2006. The NSSC will pay travel costs for any and all transition help afforded by your Center. Please see the "Help Wanted" ad and contact list below.
